What Is WRAP?

Wellness Recovery Action Plan (WRAP) is a simple, powerful process that anyone can use to get well, stay well, and deal with any situations or challenges in life. People around the world use this self-directed wellness practice for everything from depression or mental illness to health issues, life challenges and transitions, addictions, and more. WRAP is an evidence-based process for creating the life and wellness you want.

The WRAP process supports you in identifying the tools that keep you well and creating action plans to put those tools into practice in your everyday life. Along the way, WRAP helps you incorporate key recovery concepts and wellness tools into your life.

The key concepts of WRAP are:

- Hope
- Personal responsibility
